# Mission Critical Power System

Redefined Efficiency

# Uninterrupted Power Supply

## Rack Mount Modular UPS

### Capacity Range: 20~200kVA

Modular UPS is a hot-swappable, highly scalable online double conversion product that uses advanced IGBT three-level conversion and dual DSP control technology for high ease of use and reliability.

### Key Features:

- compatible with 19" standard rack cabinet, convenient to be integrated into server cabinet
- Output PF: 1
- 7" touch color LCD, more information displayed and easier for customer to operate
- 10/15/25kVA power module in 2U/3U height, saving great amount of space
- System can intelligently shut down some power modules to increase total load rate, achieving higher efficiency
- Modular design, support for hot swap, upgrade easily

# Uninterrupted Power Supply

# Power Distribution System

## Rack PDU

Rack PDU (Power Distribution Unit) provide power distribution, management and monitoring capabilities directly to IT equipment. It has been widely applied in data centers.

EDW PDU organized into the following four categories: Basic PDU, Metered PDU, Monitored PDU and Smart PDU.

## Key Features:

- Support rack-mounted and vertical-mounted in cabinet;
- The maximum number of sockets is 42 bits, supporting various socket types such as IEC, BS, NEMA, GB, etc;
- Maximum input current 63A, support one-phase, two-phase, three-phase and other voltage input specifications;
- With environmental monitoring, power monitoring, control, management, lightning protection and other functions;
- Full metal housing design, and has passed strict safety test, safe and reliable.

# Power Distribution System

## Rack Mount PDM (Power Distribution Module)

Edgeworks PDM( Power Distribution Module) is a rack mount type power management and distribution system, with built in power protection, power distribution, power management, and power metering function, for all the power branches of UPS, cooling, IT, and others within Data Center.

### Key Features:

- Compatible with 19" standard rack cabinet, minimum height 3U, seamless integration into rack installation.
- All in one design managing all the power distribution of UPS, cooling and IT branches.
- Built in UPS manual by-pass line for easier online maintenance.
- All-metal enclosure, safe and reliable.
- Built in power meter with Modbus protocol for energy monitoring and analysis.
- Support PUE calculation with power meters of main power input and UPS power output.
- Built in surge protection.
- Flexible customization adjusting breakers and power line path.
- Support 2N dual loop design by customization

#### Notes:

- If there have custom requirements, please communicate with our technical staff to confirm before placing an order.
- Product specifications are subject to change without further notice.

# Battery System

## Lithium-iron Battery Module | UPS Type

- Multiple monitoring and protection, optional cabinet-level fire protection system
- Accurate fault identification, intelligent fault prediction
- Rackmount compact size easy to install and integrate into data center solutions. High performance, high efficiency
- Complete power configuration flexible capacity expansion and transformation
- Multi-scenario applications in modes such as peak-shaving and valley-filling, emergency backup power, etc.

#### Notes:

1. “\*1” needs 800mm purposely designed cabinet for the battery installation.
2. Customizable according to customer requirements.

We believe the world is  
being totally connected.  
The connections are  
creating digital intelligence  
and a better future.

We design and deliver  
data center  
infrastructure products  
to build foundation of  
digital future.
